

GENENE TISE

FOUNDER & FULL-STACK SOFTWARE ENGINEER

Addis Ababa, Ethiopia | tise@genene@gmail.com | +251 932 508 910 gtportf.vercel.app | github.com/tise-genene | linkedin.com/in/genene-tise-253037234 | x.com/genene_tise | eaglespathway.com

PROFILE

Founder and full-stack engineer shipping production systems since age 17. Built and scaled Eagle Pathway from zero to a live cross-platform product (web + iOS/Android) with 1k+ users and 1k+ Play Store installs, all with \$0 paid marketing. Ship high-availability features at Ethiopia's largest bank (40M+ customers) while running two ventures. Strong in system design, REST API architecture, database performance, and 0-to-1 product execution. Seeking full-time remote roles, US time zone overlap.

EXPERIENCE

Founder & Full-Stack Engineer • Eagle Pathway 2023 – Present

- Founded and built Eagle Pathway end-to-end: Next.js admin dashboard, Expo/React Native mobile app (live on Google Play), and Supabase backend (PostgreSQL, Auth, Storage, Realtime); 315+ commits shipped solo and with a small team.
- Grew to 1k+ users and 1k+ app installs with zero paid marketing; 500+ sign-ups in the first 24 hours of launch alone.
- Integrated Chapa payment gateway with webhook HMAC verification and idempotency keys, replacing a fraud-prone OCR receipt-verification flow.
- Built the scholarship-application pipeline and a real-time tutor booking system across web and mobile.
- Evolved the product from Eagle Tutorials, a Telegram-based tutor-matching service (200+ students, 100+ tutors) I founded and grew for 3 years, automating 75% of manual admin matching work.
- Leading incorporation of Eagle Pathway as a registered PLC alongside two co-founders.

Software Engineer • Commercial Bank of Ethiopia Nov 2024 – Present

- Design and ship full-stack web and mobile features (React, React Native, Node.js, PostgreSQL, Flutter) within a high-availability banking system serving 40M+ customers.
- Architected secure REST APIs with JWT auth, rate limiting, and third-party payment integrations; optimized slow PostgreSQL queries, cutting response time by 60%.
- Led the UI/UX redesign of core banking interfaces, improving Lighthouse performance scores by 40% via code splitting, lazy loading, and caching.

AI Trainer, LLM & Software Engineering • AfterQuery Apr 2026 – Sep 2026

- Evaluated and improved AI-generated code and technical solutions; worked on repository-level programming challenges and model evaluation to improve reliability of AI coding systems.

Freelance Software Engineer | Top Rated • Upwork Jan 2025 – Present

- Delivered full-stack, AI-powered, and scalable software solutions for international clients, including taptosign.com, a notifications product, and an LMS platform.
- Consistent 5-star feedback; strong async communication and on-time delivery across time zones.

Full-Stack Developer • Taptosign Technologies Aug 2023 – Nov 2024

- Implemented document-signing workflows, real-time status updates, and authentication using React and Node.js REST APIs, collaborating asynchronously across time zones in an agile sprint cycle.

Emerging Technologist Fellow • Millennium Campus Network Aug 2023 – Jan 2024

- Designed and delivered a programming curriculum to 100+ high-school students; work featured on the MCN website.

Freelance Web Developer • Independent (Local Clients) 2021 – Aug 2023

- Built fixed-price web projects for local businesses, including restaurant and cafe websites, inventory management systems, and food and coffee ordering platforms, working directly with owners from requirements through launch.

SELECTED PROJECTS

AI-Powered HRMS Python • Laravel • MySQL • ML

- BSc thesis: ML-driven HR system for Ethiopian government offices automating onboarding, leave tracking, and performance management, built before LLM tooling was mainstream.

SKILLS

Backend

Node.js, NestJS, Laravel, REST APIs, PostgreSQL, MySQL, MongoDB, Supabase

Frontend

React, Next.js, TypeScript, Tailwind CSS, React Native, Flutter

DevOps / Tools

Git, Docker, CI/CD, Vercel, Render, Nginx, Redis, Agile

AI / CS

Python, Machine Learning, System Design, Prompt Engineering

EDUCATION

B.Sc. Information Systems

Addis Ababa University • 2021–2024

GPA 3.51 • Great Distinction

Thesis: AI-Powered HRMS for Ethiopian Gov. Offices

Digital Product Development

TU Munich (Coursera) • Dec 2024

Founders Academy

ALX Ventures • Dec 2024

LANGUAGES

Amharic: Native

Sidamic: Native

English: Professional

Oromo: Professional

VOLUNTEERING

Volunteer Instructor & Workshop Facilitator

Addis Ababa • 2023 – Present

- Taught C++, Python, and web dev to 100+ early-career students via community-led sessions.
- Runs free workshops on freelancing and software development; active open-source contributor on GitHub.
